

## THE SISTINE CHAPEL

“Rome has been the epicentre of art and design for centuries, and the Sistine Chapel has to be one of my all-time favourite interiors. The sheer magnitude of creative genius is an ode to the creative profession. The interior of the chapel was created by a combination of Renaissance greats such as Michelangelo, Raphael, Botticelli and Bernini, and it is a pure, artistic, visionary design. The combination of materials creates an authentic design language. The design revolves around the prolific use of art and sculpture in a variety of surreal locations, that, when viewed, leave one in awe of the imagination within the creator’s mind, as well as the impeccable craftsmanship of the artisans – in modern terms, the perfect marriage of designer and contractor.” Alfred Johnson
